### About Diligencia

Diligencia ([www.diligenciagroup.com](http://www.diligenciagroup.com)) is a specialist information services provider, focused on supporting due-diligence and corporate intelligence work within the Middle East & Africa region. Established in 2008, we combine advanced technology and human insight to extract and collate unstructured data on companies in territories where public domain information is not readily available. Clients rely on the combination of our technical retrieval skills and data curation to establish unequivocal facts upon which corporate intelligence is built and decisions become more informed.

Headquartered in Oxford, Diligencia also has offices in Tangier, Morocco and Dubai in the UAE, which support our data gathering activities across the region. In total the group currently has 70 employees representing 14 nationalities.

### What we believe and how this informs our daily decision making:

- **Clarity** – our guiding philosophy informing everything we do, from the quality of our information, how we communicate and what we enable our clients with i.e. enabling clarity in their decision making
- **Authenticity** – our information is authentic because we go to original and official data sources to establish unequivocal facts. We also strive to be authentic, open, and honest in our relationships with each other internally, and the clients and partners we work closely with; we provide information on emerging markets, which we believe should be easily and openly accessible to everyone
- **Tenacity** – we have had to work hard to build our database, tying together data from several different sources, sometimes entering it manually. Our company history therefore speaks of tenacity, the same kind of tenacity and attention to detail all our employees show when they go about their research
- **Relationships** – the relationships between the subjects on our database unlock the power of our information; the relationships we have with our clients, our employees, our suppliers, and our host governments are also key to our future success
